DNP3 Device Profile Document	
Master Expects Binary Input Change Events: <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Either time-tagged or non-time-tagged for a single event <input type="checkbox"/> Both time-tagged and non-time-tagged for a single event <input type="checkbox"/> Configurable (attach explanation) 	
Sends Unsolicited Responses (Slave Only): <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Never <input type="checkbox"/> Configurable (attach explanation) <input type="checkbox"/> Only certain objects <input type="checkbox"/> Sometimes (attach explanation) <input type="checkbox"/> ENABLE/DISABLE UNSOLICITED Function codes Supported	Sends Static Data in Unsolicited Responses (Slave Only): <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Never <input type="checkbox"/> When Device Restarts <input type="checkbox"/> When Status Flags Change No other options are permitted.
Sends Multi-Fragment Responses (Slave Only): <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	

The Client sends to remote devices the subset of DNP3 objects, variations, qualifiers and function codes listed in Table 1.

Table 1: DNP3 Subset Sent by the Client under normal operation

Object			Request		
Obj	Var	Description	Function Codes	Qual Codes (Hex)	Sent...
1	0	Binary Input [All variations]	READ (1)	06	On a periodic basis as configured by the user
2	0	Binary Input Change [All variations]	READ (1)	06	On a periodic basis as configured by the user
10	1	Binary Output Status	READ (1)	06	On a periodic basis as configured by the user Sent immediately following the issue of a CROB command. Also sent (according to user config) if LOCAL IIN detected.
12	1	Control Relay Output Block	SELECT (3) OPERATE (4) DIRECT OPERATE (5) DIRECT OPERATE - NO ACK (6)	28	Only on demand.
20	0	Binary Accumulators [All Variations]	READ(1)	06	On a periodic basis as configured by the user
21	0	Frozen Accumulators [All Variations]	READ(1)	06	On a periodic basis as configured by the user
22	0	Accumulator Change Events [All Variations]	READ(1)	06	On a periodic basis as configured by the user
23	0	Frozen Accumulator Change Events [All Variations]	READ(1)	06	On a periodic basis as configured by the user
30	0,1,2,5,6	Analog Inputs [All Variations, 16 Bit, 32 Bit, Float, Long Float]	READ(1)	06	On a periodic basis as configured by the user
31	0	Frozen Analog Inputs [All Variations]	READ(1)	06	On a periodic basis as configured by the user
32	0	Analog Input Change Events [All Variations]	READ(1)	06	On a periodic basis as configured by the user

Object			Request		
Obj	Var	Description	Function Codes	Qual Codes (Hex)	Sent...
33	0	Frozen Analog Input Change Events [All Variations]	READ(1)	06	On a periodic basis as configured by the user
40	0,1,2	Analog Outputs [All Variations, 16 Bit, 32 Bit]	READ(1)	06	On a periodic basis as configured by the user
50	1	Time and Date	WRITE (2)	07 quant = 1	Regularly scheduled and/or in response to TIME SYNC REQUIRED IIN.
60	1	Class 0 Data	READ (1) ENABLE UNSOLICITED (20) DISABLE UNSOLICITED (21)	06	READ sent periodically, in response to various IINs. ENABLE/DISABLE UNSOLICITED sent as configured upon startup, and on receipt of a NULL Unsolicited Response
60	2	Class 1 Data	READ (1)	06	On periodic basis, to retrieve a configured number of class 1 events.
				06	On periodic basis, in response to various IINs.
			ENABLE UNSOLICITED (20) DISABLE UNSOLICITED (21)	06	ENABLE/DISABLE UNSOLICITED sent as configured upon startup, and on receipt of a NULL Unsolicited Response
60	3	Class 2 Data	READ (1)	08	On periodic basis, to retrieve a configured number of class 2 events.
				06	On periodic basis, in response to various IINs.
			ENABLE UNSOLICITED (20) DISABLE UNSOLICITED (21)	06	ENABLE/DISABLE UNSOLICITED sent as configured upon startup, and on receipt of a NULL Unsolicited Response
60	4	Class 3 Data	READ (1)	08	On periodic basis, to retrieve a configured number of class 3 events.
				06	On periodic basis, in response to various IINs.
			ENABLE UNSOLICITED (20) DISABLE UNSOLICITED (21)	06	ENABLE/DISABLE UNSOLICITED sent as configured upon startup, and on receipt of a NULL Unsolicited Response

Object			Request		
Obj	Var	Description	Function Codes	Qual Codes (Hex)	Sent...
80	1	Internal Indication	WRITE (2)	00	On receipt of a response containing the DEVICE RESTART bit set.
No object			DELAY MEASUREMENT (23)	None	On demand. If Auto Time Synchronization Enable is True it will also be sent in response to the TIME SYNC NEEDED IIN.

1.1 Profile of Normal Operation

The following table describes all the DNP3 objects, function codes, and qualifiers sent or received by the DNP3 Client software during normal operation. Each line of the table lists an object variation.

If the *Request* columns are blank, the Client does not send that object variation to remote devices. If the *Request* columns are non-blank, they indicate that the Client sends that object variation, with the specified function codes, under certain conditions.

The *Sent When* column describes these conditions, as follows:

- D** : The Client sends the request when a local software application **Demands** it do so.
- O** : The Client sends the request following a previous **Output** request.
- I** : The Client sends the request as a result of an **Internal Indication** from the remote device.
- A** : The Client sends the request **Automatically** as a part of its own operation, e.g. at start-up time, or if the local time changes.
- P** : The Client sends the request **Periodically**.
- (C)** : Following any of the above indicates the Client can be **Configured** to perform or not perform the request in this manner.

If the *Response* columns are blank, the Client does not accept the object variation and will discard any message containing that object variation. If the *Response* columns are non-blank, the Client accepts the object variation in responses, provided the remote device uses a valid function code and qualifier.

A "✓" in the *Uses* column means that the Client stores or forwards the data; otherwise, it ignores the object when parsing.

Table 2: DNP3 Subset Implemented by the Client

Object			Request			Response
